SUMMARY

Final-year BCA (AI & Data Science) student with hands-on experience in Data Analytics and Business Intelligence using Python, EDA, PostgreSQL, Power BI (DAX, star schema), and Excel. Skilled in transforming raw transactional data into relational data models and interactive dashboards, analyzing ₹137M+ in revenue to generate actionable HR, finance, and sales insights.

TECHNICAL SKILLS

Languages & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn) · SQL
BI & Visualization: Power BI (DAX, Power Query, Star Schema) · Excel (XLOOKUP, FILTER, Power Pivot, Pivot Tables)
Databases & Tools: PostgreSQL · Git & GitHub · VS Code · Jupyter Notebook
Core CS: Object-Oriented Programming, DBMS

KEY PROJECTS

HR Analytics & Employee Attrition Dashboard

GitHub: github.com/yashawasthi27/HR-Analytics-Dashboard

- Cleaned and feature-engineered the IBM HR Attrition dataset (1,470 employees, 35 features) in Python/Pandas, then queried PostgreSQL to quantify attrition risk by department, age group, and tenure against a ~16% baseline.
- Built a star-schema Power BI model with DAX measures powering a 3-page dashboard (overview, attrition, salary).
- Found overtime employees attrite at 3x the rate of non-overtime staff (30.5% vs 10%) and employees in their first 2 years churn at ~30%, informing HR retention recommendations.

Technologies: *Python · Pandas · PostgreSQL · Power BI · DAX · Star Schema*

Finance Analysis Dashboard

GitHub: github.com/yashawasthi27/Finance-Analysis-Dashboard

- Built a multi-page Power BI dashboard analysing ₹137.73M in sales across 14.94K transactions for a finance company, covering revenue, fees, tax, and risk KPIs.
- Transformed raw transaction data via Power Query and modeled it into a relational schema, then authored DAX measures including a dynamic SWITCH-based metric switcher toggling between Sales, Fee, Tax, and Average Transaction Value.
- Surfaced segment- and state-level insights — Retail led at ₹76M, Maharashtra topped states at ₹22M — and flagged ₹14.37M in failed transactions as a risk area for the business.

Technologies: *Power BI · DAX · Power Query · Data Modeling*

E-Commerce Sales Analytics (SQL)

GitHub: github.com/yashawasthi27/sql-ecommerce-analysis

- Designed a normalized PostgreSQL schema (customers, categories, products, orders, order items) for a 400-order, 1,000+ line-item Indian e-commerce dataset.
- Wrote 12 analytical queries using CTEs, window functions (LAG, DENSE_RANK, SUM OVER), and subqueries to compute MoM revenue growth, top products per category, and customer lifetime value.
- Built CASE-based customer segmentation (one-time / repeat / loyal) and churn detection, finding Electronics drove ~28% of revenue and 42% of buyers were one-time — a targeted re-engagement opportunity.

Technologies: *PostgreSQL · SQL · CTEs · Window Functions*

Data Jobs Salary Analysis Dashboard

GitHub: github.com/yashawasthi27/Excel_Project

- Built a fully dynamic Excel dashboard analyzing real-world data-domain job postings — no VBA, calculation engine powered entirely by chained formulas.
- Wired dropdown filters (Job Title, Country, Employment Type) using XLOOKUP, FILTER, and Power Pivot to drive real-time salary charts and KPIs.

Technologies: *Excel · XLOOKUP · FILTER · Power Pivot · Pivot Tables*

EDUCATION

BCA — Artificial Intelligence & Data Science **2024 – 2027**
SAGE University, Bhopal | CGPA: 7.71

CERTIFICATIONS

- HackerRank SQL (Advanced) — Credential ID: 0D1C8D1C01A4
- Power BI for Data Analysts — Microsoft (LinkedIn Learning)
- Oracle Agentic AI Professional Foundations Associate — Oracle
- TCS iON Career Edge – AI Foundation

ACHIEVEMENTS

- **Copyright Registered (Govt. of India) —** Co-author, "An Intelligent Face Recognition-Driven Attendance Monitoring System with Python-Based Implementation" (Certificate No. LD-20260194422, 2026)
