Aspiring Data Analyst | Python · SQL · Power BI · Excel

+91 9179635895 | yashonwork247@gmail.com

PROFESSIONAL SUMMARY

BCA (AI & Data Science) student with hands-on experience in SQL, Python, and Power BI. Built real-world projects involving end-to-end data pipelines, business KPI dashboards, and customer segmentation. HackerRank SQL (Advanced) certified. Seeking a data analyst internship to apply analytical skills and deliver actionable business insights.

TECHNICAL SKILLS

SQL	Python	Power BI	Excel
PostgreSQL	Pandas / NumPy	DAX / Power Query	Data Visualization
Data Modelling	Matplotlib / Seaborn	Advanced Excel	Data Cleaning
Query Optimization	Data Wrangling	Pivot Tables / XLOOKUP	ETL Pipelines

PROJECTS

Retail Sales Performance Analytics Pipeline [\[SQL / PostgreSQL\]](#)

[\[GitHub ↗ ↗\]](#)

PostgreSQL · Python · Data Modelling · Query Optimization

- Designed and implemented a 5-table normalized PostgreSQL schema for an e-commerce dataset with ~10,000 rows, covering orders, customers, products, categories, and sales.
- Wrote advanced SQL queries including self JOINS, correlated subqueries, recursive CTEs, and window functions to extract business insights on sales trends, top products, and customer behaviour.
- Performed Python EDA with RFM segmentation to classify customers as high-value, at-risk, and dormant; resolved a UnicodeDecodeError with encoding fix for real-world data.

Data Analyst Job Salary Dashboard [\[Excel\]](#)

[\[GitHub ↗ ↗\]](#)

Excel · Data Visualization · KPI Dashboard

- Analyzed a real-world dataset of 33,000+ data job postings (2023) to build an interactive salary dashboard for data professionals across roles, locations, and employment types.
- Implemented 3 real-time KPIs (Median Salary, Job Count, Top Job Platform) using XLOOKUP, FILTER, SORT, COUNTIFS, and a custom MEDIAN-IF formula to dynamically respond to slicer inputs.
- Visualized insights via a bar chart (salary by job title), horizontal bar chart (salary by employment type), and a choropleth world map; all charts update live with filter selections.

AdventureWorks Sales Dashboard [\[Power BI\]](#)

[\[GitHub ↗ ↗\]](#)

Power BI · DAX · Power Query · Star Schema

- Built an end-to-end Power BI report on the AdventureWorks dataset using a star schema data model with fact and dimension tables connected via Power Query transformations.
- Created 6 custom DAX measures tracking \$9.72M revenue vs \$6M target, with KPI cards, time-series trend charts, product category breakdowns, and regional sales maps.
- Published to Power BI Service; designed for interactivity with cross-filtering slicers for region, product category, and time period.

CERTIFICATIONS

HackerRank SQL (Advanced) — HackerRank

May 2026
